

ASSOCIATE SOFTWARE ENGINEER

- **Location :** On Site

RESPONSIBILITIES :

- Assist in the design, development, and maintenance of scalable web applications.
- Contribute to building and deploying RESTful APIs to support frontend features.
- Participate in the full software development lifecycle under the guidance of senior team members.
- Help troubleshoot and debug issues across the application stack.
- Collaborate with cross-functional teams including product managers and other engineers in an agile environment.
- Learn to analyze technical problems and develop solutions using algorithms and data structures.
- Support the optimization of applications for performance and scalability.

REQUIREMENTS :

- Degree in Computer Science, Software Engineering, or equivalent practical experience (including bootcamps).
- Up to 1 years of hands-on experience in software development, including academic or personal projects.
- Familiarity with modern front-end frameworks, especially React; exposure to TypeScript is a plus.
- Foundational knowledge of back-end development with Java and Spring Boot.
- Understanding of computer science fundamentals (algorithms and data structures).
- Familiarity with code versioning tools, specifically Git.
- Exposure to or academic knowledge of cloud services (AWS), containerization (Docker), and CI/CD concepts is desirable.
- Eagerness to learn new technologies and a strong collaborative mindset.
