

SISARA GROUP OF COMPANY

SOFTWARE ENGINEER - FULL STACK

- **Location :** On Site

RESPONSIBILITIES :

- Design, develop, and maintain scalable web applications.
- Build and deploy robust RESTful APIs to support frontend features and data processing.
- Own the complete software development lifecycle from design to deployment and support.
- Troubleshoot, debug, and resolve issues across the application stack to ensure system reliability.
- Collaborate with cross-functional teams including product managers and other engineers in an agile environment.
- Analyze complex technical challenges and develop effective solutions using algorithms and data structures.
- Optimize applications for maximum performance, speed, and scalability.

REQUIREMENTS :

- Degree in Computer Science, Software Engineering, or equivalent practical experience.
- Minimum of 2 years of proven hands-on experience as a Full Stack Developer.
- Professional experience with modern front-end frameworks, specifically React with TypeScript.
- Strong back-end development skills with Java and the Spring Boot framework.
- Solid understanding of computer science fundamentals, including algorithms and data structures.
- Proficiency with code versioning tools, specifically Git.
- Hands-on experience with messaging systems, specifically Kafka.
- Proven experience with AWS services and deploying applications in a cloud environment.
- Practical experience with Docker and CI/CD pipelines.
- Excellent communication skills and a collaborative, team-oriented mindset.
