

SISARA GROUP OF COMPANY

WEB DEVELOPER

- **Location** : On Site

RESPONSIBILITIES :

- Design, develop, and maintain modern, responsive, and user-friendly websites from concept to launch.
- Create wireframes, mockups, and prototypes to effectively communicate design ideas.
- Transform UI/UX designs into high-quality, functional code, ensuring a seamless bridge between design and implementation.
- Build and deploy performant websites and web applications using React and the Next.js framework.
- Develop and maintain all visual assets, including graphics, icons, and layouts, using Adobe Creative Suite.
- Ensure all designs are technically feasible and optimize applications for maximum speed, scalability, and user experience.
- Manage and update website content, design elements, and functionality as needed.

REQUIREMENTS :

- Minimum of 1 year of professional experience in web development and design.
- Proficiency in modern front-end frameworks, specifically React and Next.js.
- A strong portfolio demonstrating expertise in both UI/UX design and front-end development.
- Hands-on experience with design software, specifically Adobe Photoshop and Adobe Illustrator.
- Strong foundational knowledge of core web technologies: HTML5, CSS3, Tailwind, Bootstrap and JavaScript.
- Ability to own the complete process, from visual design and user experience to front-end development.
- Excellent communication skills and the ability to work effectively in a collaborative team environment.
